**Every Horses Dream** - Ingredients: acidophilus/ bifidus / rhamnosus -a blend of 3 probiotics,, lipase /protease /amylase-a blend of 3 enzymes, kelp, chaste tree, orange, lemongrass,, cranberry

Name: Alden Voth

My husband had seen Julie 2 years ago for the first time. He had been diagnosed with Spinal Stenosis and they wanted to do surgery, but only gave him a 30% success rate. He lived in pain daily and could not make it through the day without laying flat out and resting for several times a day, and after supper would spend the rest of his evening flat on his back again in pain. He took pain medication daily but they did not help much.

After seeing Julie she did a full nutrition program and body alignment and found he had a bacteria infection in his body from eating mushrooms. He started Julie's program and started to feel better. He has seen her approximately every 4 months and he is currently pain free 95% of the time. He has used many of the Laodas Way products, especially "No More Pain" when things were bad.

The doctors also told him with his back "it wasn't if he would end up in a wheel chair it was WHEN!"

As he was going through the programs with Julie he went and seen the doctor and found he also had hypothyroidism and had too high of an Iron count in his blood. Julie had added all natural nutrients to work with these issues and when he went back to the doctor 6 months later there was no trace of either hypothyroidism or the high Iron count in his blood.

He now comes home and builds on our new house as well as helps with farm chores. He is still doing programs with Julie and we are so thankful she came into our lives or the doctors may have been right. The best part is it's all done naturally with no pills and no side effects.

**B Ready** - Ingredients: B1 (thiamin), B2 (riboflavin), B3 (niacin), B5 (pantothenic acid), B6 (pyridoxine), B12 (cobalamin), folic acid, choline, inositol, paba, dried yeast cell

**Dog Be Gone** - Ingredients: purslane, cinnamon, aloe vera

**Zest Muscle Rub** - Ingredients: marjoram, tea tree, orange, camphor, menthol, ravensara, cajput, wintergreen, jojoba cream

## Laodas-Way Healing

# Success Stories

Client: Casper  
Breed: Shetland  
Age: Senior

Casper came to us as a senior Shetland pony with advanced Cushings. I saw an ad for Laodas-Way Healing and decided to book a body balance treatment for him. I was so impressed by Casper's improvement after only 2 treatments, that I decided to take Julie's Equine Adjustment Chart Class so I could learn how to do the work on him myself. Julie also put him on a nutrition program which improved his energy and the quality of his coat. That spring he shed out his 4" long curly coat, and he continued to shed normally thereafter. His eyes also became less bulgy and his feet were healthier with her help and the help of good farrier work.

We could not use any vaccines or chemical products, as Casper would spike a fever and go off his feed for days. He was, however, able to tolerate and enjoyed the Laodas-Way products. We used the parasite(Parasite Dust / Dog Be Gone / Clean and Free) products for worming, the Joint Ezz, Every Horse's Dream, and No More Pain to help his mobility, and he got a lot of relief from a custom made Blue Tansy Muscle liniment.

Casper died at the age of 36, and he was an amazing, full of life little fellow right up until the end. We are very grateful to Julie for helping us give him the quality of life he so deserved.

Client: Gibson  
Breed: Thoroughbred  
Age: 6

My 6 year old Thoroughbred started loosing weight spring 2014. His coat was not shedding and was dull, long, and rough. He started to look unhealthy and was hard to tack and mount. What really made me worry was when he started urinating dark colours and seemed to be in pain while urinating. Julie diagnosed him via distance consultation to have kidney stones and infection, bladder infection, and bacteria in his stomach.

Following her program he began urinating normal in a week. His coat started shedding out and returning back to its shiny red bay colour. A short 6 weeks later I took him to a show where he performed wonderfully.

He was easy to tack and mount again and looked happy and healthy once again. He was on a regular chemical worming schedule before, but it wasn't enough. Using Julie's natural wormers as well helped him become much healthier. A few months later I had Julie out to treat him. I always found he struggled with his hind end and she identified issues in his hind end right away before I even had a chance to bring it up. His movement has improved since her hands on treatment. He is currently on maintenance usage of her Infinity feed. Being a hard keeper it really helps me get him what he needs and I don't have to stress so much about what my hay might be missing. It's great to finally be able to get straightforward diagnosis' and treatments that work.

Client: Sam  
Breed: Lab/Retriever mix  
Age: 4

The symptoms that were immediately noticeable was she was very quiet as she usually is jumping/running around like a jack rabbit. I was out feeding horses and she came over and sat beside me and wouldn't leave my side (this was a Friday night). Later that evening, we brought her into the house to inspect her more thoroughly. Nothing made her flinch or cry out. By Sunday, we knew something was seriously wrong as she wasn't getting any better, but worse. We debated on whether to take her to the vet or call Julie. We called Julie and set up an appointment for that Thursday. By the time Julie saw her, she walked everywhere with her tail down with no movement and had started to flinch whenever she was touched.

Julie's treatment plan was chiro and energy work. The prognosis was her back was misaligned. Julie explained that it would feel like a herniated disc in our back. Julie felt that she had struck her back on something (we figured it was from going under the wooden fence with the horses).

- We were to apply muscle liniment on the whole back and right hip for 1 month
- 10ml apple cider vinegar 2 x/day for 1 month
- 200 mg anti inflammatory for 8 days(am)
- 3 ml mineralized for 1 month
- 500 mg Vit C x2 for 10 days then 1x for rest of month
- 2 ml Cranberry/day for 1 month
- 3 ml Calm, Cool, Connected/day for 2 weeks(pm) then
- 2 ml Calm, Cool, Connected/day for 2 weeks(pm)
- 1 ml of Baking Soda in one week (no apple cider vinegar that day)

We were also feeding her dog food that she apparently did not like and Sam wanted her old brand back.

Julie advised to keep her quiet for at least a month with hand walking.

The results were amazing. The initial treatment was in the morning and by that evening at suppertime, she was jumping again. We were so happy to have our Sam back. We had Julie out for a 1 week followup visit and Sam was back to normal. As the week went on, it got increasingly hard to keep her from jumping around. She is a very happy, healthy dog who I believe would not have been around without Julie's help. - Kim Watson

# Success Stories

After getting into an accident with my horse, Julie created a program for my horse, he soon was all healed up and healthy but I needed a lot of work. The accident caused me to lose all confidence in the saddle, even once my horse was better I still didn't ride much, maybe 30 times over one and a half years. I asked Julie to assist with my depression, anxiety, panic attacks and most importantly my confidence.

After being on an assortment of Laodas-Way product as well as other products recommended by Julie for about 2 months, I was once again riding full time. After 3 months I was riding bareback and hands free, something I had not done in almost 2 years due to low confidence. Thanks to Julie's program my panic attacks are few and far between, and my depression and anxiety are controllable.

I have used Julie's programs for my horses for a few years, so I knew that her methods worked. I now know that her methods work on people as well, and I have started my dog with her too! I highly recommend Laodas-Way Healing

# Success Stories

Client: Bucky

Breed: APHA

Age: 3

Bucky is a 3 year old paint gelding who was shown as a yearling and as a 2 year old, so he has had a lot of handling. I have been training horses for nearly 40 years. I have not had many horses in that time that I felt should go home. The first day he was in our barn, we were turning horses out. When it was his turn, I opened the door and he was coming out 'now'. I went to push him back and he struck at me. I found this very odd, because he seemed like a nice little horse. So, I thought maybe he needed to learn some patience. I tied him to the arena wall by himself. This is something I have done before, usually they get mad but after an hour or 2 they calm down and are happy to see you. Not Bucky, I tried this for 3 days and he just got worse. His riding was like being on a time bomb. He did not buck, but he was so tight, and would freak out at the tiniest sounds, and could not concentrate on anything. I called the owner and asked if I could give him a month off, she said fine. I was scared he was going to lose his mind. The month off made no difference. He would have a temper tantrum about the silliest things. Then I called Julie. She worked on him and started him on herbs. There was a difference in days and after 3 weeks it was like I had a totally different horse. Absolutely amazing! Thank you so much Julie

Client: Tank  
Breed: Jack Russell  
Age: 6

My 6 year old Jack Russell named Tank was injured this February. He was running down stairs and fell and landed on his back. He was paralyzed in his back legs. We took him to the vet, he had not broken any bones, the vets felt he had a slipped disk. We were told he would need laser treatments and possibly surgery if he did not walk soon. He was not in a lot of pain and wanted so bad to move his back legs. We had to help him walk. I was in a course with Julie and contacted her to see if she would look at him. Was really concerned about him. I drove him to her and she did an assessment on him and gave him a program. Tank was injured on Monday night, he stayed at the vet clinic till Tuesday and we then brought him home. I took him to see her on Thursday and by Friday he was trying to stand up on his own. By the end of the weekend he could stand on his own and getting good at walking without help. It is months later and Tank is doing great, he can get up stairs and on couches all by himself, is running around like crazy. Such a happy dog. Very grateful for what Julie was able to do for him, he can now enjoy his life.
